This is a Garment Inventory Management System developed using ASP.NET Core, designed to manage stock, categories, suppliers, and transactions in a garment business.
It helps streamline inventory tracking, supplier management, and transaction logging to improve business efficiency.

.NET CORE — Ocober-2024

Worked on integrations with BACEN systems using .NET Core, ensuring secure and compliant financial data exchange. Developed APIs and services for regulatory reporting and automated transaction workflows, adhering to Brazilian Central Bank standards.

React.js — Ocober-2023

Built responsive and dynamic user interfaces using React.js and integrated FontAwesome for intuitive iconography and visual feedback. Implemented reusable components and ensured cross-device compatibility.
